To whom it may Concern,

This note is to inform you of my request to stop trying to ban the instant weather and traffic channels. As a professional truck driver, these channels provide a wealth of information that is invaluable. These channels enable me to keep informed of the road and weather conditions in the areas i am travelling to. With the new regulations regarding log books and my hours on duty, knowing which routes are potential problems and knowing what weather i will be facing enables me to stay within the law and meet the time schedule set for me by my employer. Without this service, my ability to meet the expectations of my employer, while staying legal would be negatively effected. Please do not allow this bill to pass.

Thank You

James M. Criss
